Course Topic and Objectives

Reason for enrolling

Outline the relevance of the topic for the student's program.

Course structure

Example: meeting structure and frequency (if supervisor and student expect to be absent for a part of the term, what arrangements are in place), lab work required, fieldwork required, etc.

Evaluation

Example: weekly discussions (%), term paper (%), due date, paper scope and approximate length (e.g., original research, literature review), etc.

Timeline

Example: if data collection is involved (experiment, fieldwork), what are the anticipated dates (e.g., ethics approval, off site fieldwork, etc.); for project landmarks (e.g., literature review), what are the anticipated dates of completion.

PROVISIONAL READING LIST

Enter reading list here. It needn't be exhaustive, but it needs to be comprehensive enough to show the reading list has been given thought and consideration. **Include full name of author and text.**
